Modules:	<ul style="list-style-type: none"> Module 1: Fundamentals of Sustainability, Business and Governance. Module 2: Environmental Principles, Policy and Legislation. Module 3: Environmental Management/Assessment Tools and Skills.
Assessment:	Three knowledge based assignments (one per module) and one assessment of competence exercise based upon work experience.
Results after successful completion:	PIEMA – Practitioner level membership of the IEMA.
Study method:	E-learning.
Start date:	You may start at any time.

Who is the course aimed at?

The course is aimed at anyone who:

- Is working within environmental management and requires detailed knowledge of environmental/sustainable principles, management tools and skills to effectively deliver positive change.
- Wishes to upgrade to Practitioner Membership.

Course Content:

Module 1: Fundamentals of Sustainability, Business and Governance

- Explain the implications of global trends for the environment, for society, for the economy and for organisations and the role of an Environment/ Sustainability practitioner in overcoming these challenges.
- Explain sustainable business/governance models, their underlying principles and their relationship with organisations, products and services.

Module 2: Environmental Principles, Policy and Legislation

- Explain environmental principles and their relationship with organisations, products and services.
- Explain major policy and legislation and their implications for organisations, products and services.

Module 3: Environmental Management/Assessment Tools and Skills

- Explain major and relevant tools, techniques, systems and practices, their application and how they can be used to develop sustainable products and services and improve sustainability performance.
- Explain the role of innovation and other leading practices in developing sustainable products and services and providing sustainable solutions.
- Collect and critically analyse data, and report information that informs decision making.
- Identify problems and assess opportunities that deliver innovative and sustainable products and services.
- Determine, implement and measure methods of effective communication.
- Identify and engage in two-way communication with stakeholders.
- Apply or implement tools, techniques, systems and practices that identify opportunities and risks.
- Deliver projects and programmes that achieve performance improvement.
- Implement change and transformation.

Entry Requirements:

A foundation level of environmental and sustainability knowledge gained through work experience or a relevant course e.g. the IEMA Foundation Certificate in Environmental Management or equivalent.
